Client video testimonials

"It is the attention to detail that really sets Voyager Infinity apart from other databases that I've used. It's like they've gone round every recruiting company and then decided to create a system that offers the best of everything."

Kelly Knopp, Founder, Southern Education Recruitment

- New start-up
- REC member
- Perm & contract recruitment
- Chose Voyager Infinity over many suppliers

- Established boutique firm
- APSCo member
- Perm, search & contingency recruitment
- Migrated from one of the best-known CRMs

"Having a CRM and a data solution that underpins a high growth recruitment agency is paramount. We've been delighted to see how things have worked with Voyager Infinity over the last few years and are really excited to see the next evolution of that platform."

Chris Dunning-Walton, Director, InfoSec People

"Thanks to Voyager Infinity and ISV.Online, we're working quickly, efficiently, to give our candidates and clients the best service possible. The investment we made in switching to Voyager with ISV integration has been one of the most sound business moves since we set up."

Rebecca Bannerman, Director, Amber Employment Services

- Local recruitment business
- REC and TEAM member
- Perm, temp & contract recruitment
- Used Voyager Infinity and ISV.Online for over 2 years

Great technical support

Great technical support, got an answer to my problem within 30 minutes of sending it.

Voyager ✦

Voyager Infinity
Security, Resilience & Disaster Recovery

❋ Infinity is a client-server application that can be deployed:

- entirely on-premise

- in a SaaS environment with Voyager Software hosting the service and data on the Azure platform

❋ User Authentication: Each Infinity user, whether on SaaS or on-premise will be given a unique username and password managed from within the Infinity product by users with the necessary permissions

❋ A third-party security company conducts regular penetration of the Infinity SaaS product

❋ Infinity is developed using automated continuous deployment and this means regular updates (bugs fixes and new features) deployed seamlessly to all users

❋ Automatic georedundant full, differential and transactional backups retained for 35 days

Voyager ❋

Voyager Infinity
Security, Resilience & Disaster Recovery cont.

✤ A full Disaster Recovery restore of the database is expected to take less than twelve hours and less than one hour's worth of data would be expected to be lost

✤ All staff who have access to client data are reference checked, are trained on data protection legislation and cyber security and are subject to a confidentiality agreement

✤ On occasions where our support teams might need access to front end client systems this is typically undertaken via specialised tool which does not expose the logon credentials to the end user.

✤ Risk Assessment is a permanent item on the board agenda

WHAT WE DO

Voyager	**isv.online**	**FileFinder**	**Talentis GLOBAL**	**GatedTalent**
Easy-to-use, innovative, all-in-one recruitment software that streamlines recruitment processes and automates mundane admin tasks, making businesses more efficient, customer-centric and competitive.	Market leader in online skills testing and training, working with consultancies and employers to help them secure and retain the best talent. ISV gets the recruitment process right by avoiding bad hires and improving onboarding.	Leading cloud executive search software used by thousands of executive search recruiters globally. Easy-to-use yet feature-rich management app designed specifically for executive search and headhunting.	Talentis is the next generation candidate sourcing tool. Its proprietary Talentis TalentGraph takes advantage of AI and big data technology to allow executive recruiters to track and engage with potential candidates across the web.	The private network designed to allow senior executives from more than 100 countries to share their information, achievements and aspirations with executive search firm, all while supporting GDPR compliance.

Voyager Infinity is fully integrated with ISV.Online Skills Testing

FileFinder SaaS clients benefit from no-cost access to Talentis and senior level candidates who are GatedTalent members
